

DRONE MODULE FOR ATHENA RMS

With over 82% growth in drone law enforcement usage in the past 5 years, fast adoption has led to gaps in reporting and monitoring through record management tools (RMS).

Introducing Athena Drone Module for RMS. This new module features:

- Ability to associate drone reports with Call for Service
- Detailed tracking fields
- Link to incident case numbers
- Precise location mapping
- Ability to attach video and other media files
- Direct export for FAA and state reporting
